

**STEPGEAR®**  
**TRAINING FOR REAL**

**SG-360**

SG-360

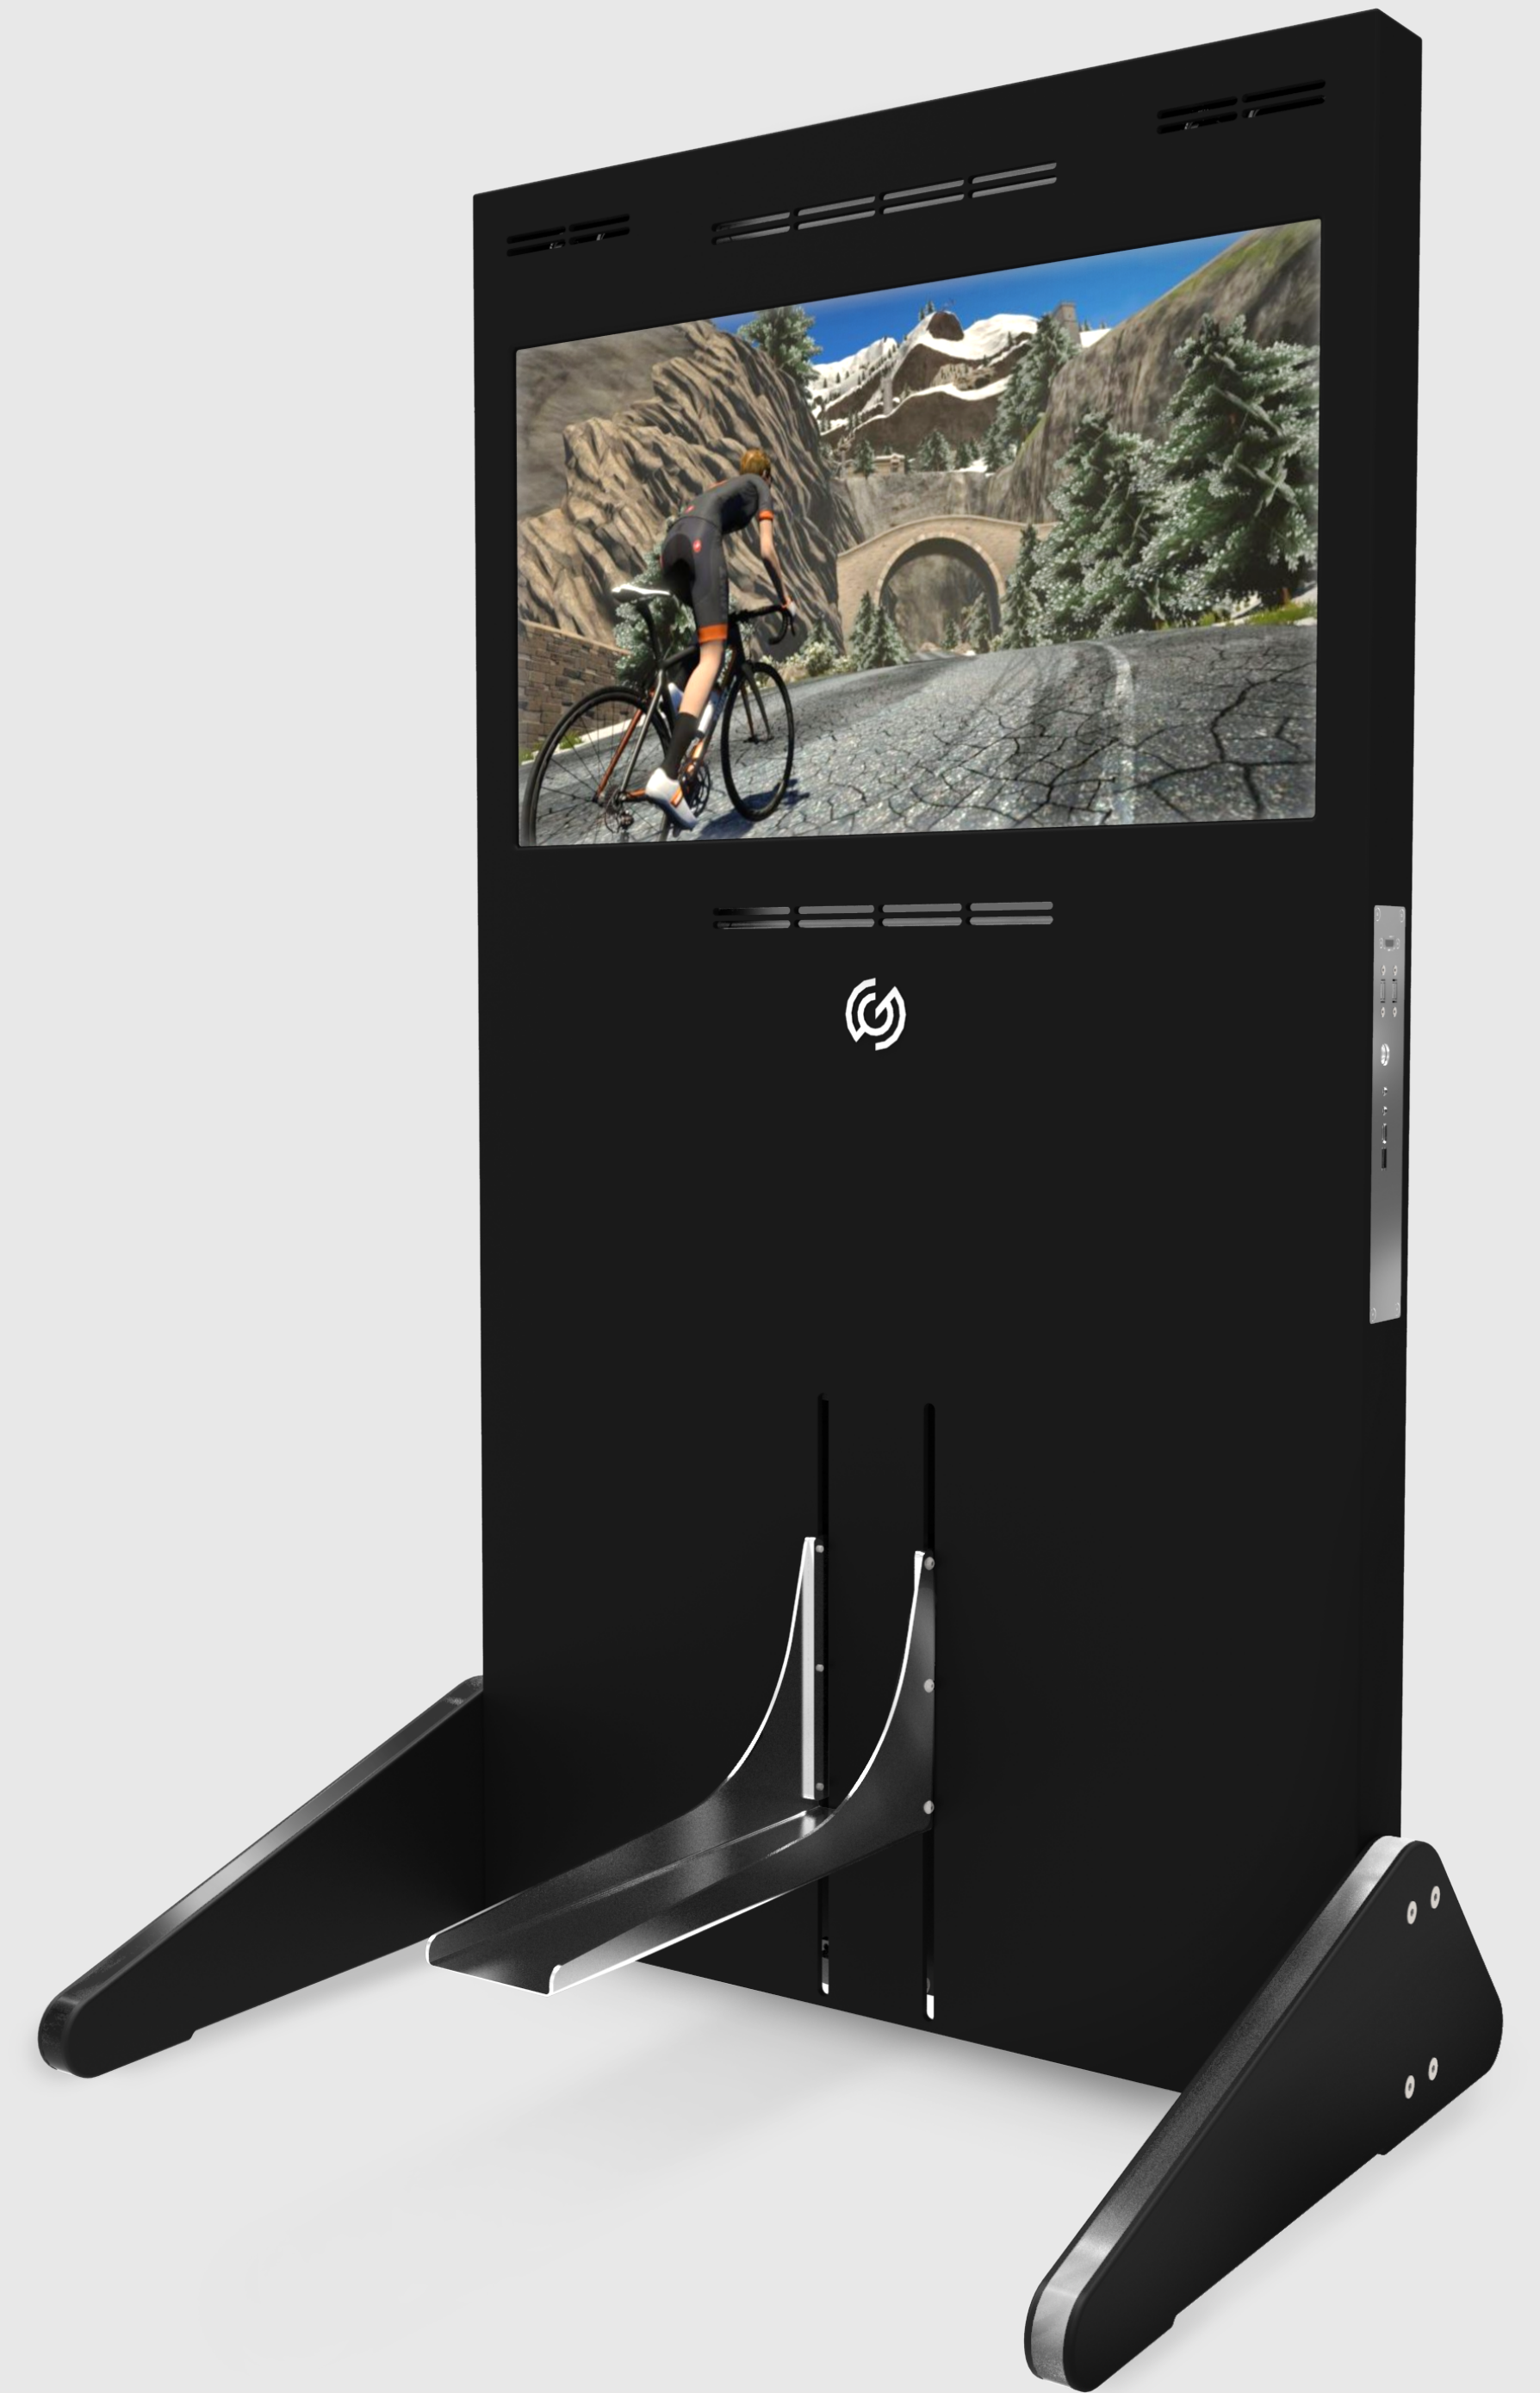

# THE UNIVERSAL TOTEM

## IMMERSE IN A NEW TRAINING EXPERIENCE

We want you to live a totally engaging experience, so we patented a **MULTIFUNCTIONAL CYCLING PLATFORM**. Its multiple functions and multisensorial design **improve the efficacy and comfort of your training.**

## LIVE THE OUTDOORS AT HOME

The 32" integrated touchscreen with 2.1 professional audio system steeps you inside your training, to increase your motivation and take your fun and performance to new heights.

# MAXIMUM COMFORT IN EVERY SITUATION

## INTEGRATED FANS

Keep cool and enjoy your training even more. The patented system is managed by a PC that controls **two separate fans** that you can program manually, based on your preferences, or automatically, according to the intensity of the training programme.

## 25% MAX GRADIENT

The **integrated front wheel lifting system** gives your experience a true life quality. The combination of incline and resistance creates the feeling of cycling uphill, making your training for outdoor events more effective and your virtual routes and challenges more fun.

# GOOD FOR YOU AND THE ENVIRONMENT

## FUTURE-PROOF AND SUSTAINABLE DESIGN

The Totem is **100% made in Italy** and assembled in our CasaClima Gold Nature certified plant. Made of Krion™, a naturale and eco-sustainable next generation material without porosity, it offers **high resistance to impacts and stains. 100% recyclable, it can be reprocessed and reused.** If used together with SG-3, it can be powered by the energy produced by the latter.

## UNCOMPROMISING QUALITY

All biomechanical components have been carefully selected to offer the **best and most reliable performance**, always preferring Italian products. To ensure you get full assistance, electronic components are covered by worldwide guarantee.

# THE BEST EXPERIENCE WITH ANY TRAINER

Turn your indoor training into a multisensorial experience that enhances your life and your surroundings.  
**SG-360 is compatible with all brands of home trainers and training/gaming platforms.**

## FOR YOUR HOME

The Totem is a multimedia station that doubles up as screen, computer and audio system when you are not training.

## FOR YOUR BIKE HOTEL

An exclusive service for your guests that is ideal for bad weather, warming up or rerunning the day's route.

## FOR YOUR GYM

It is the perfect audio video system for your virtual group classes or one-on-one cycling personal training.

## FOR YOUR SHOP

Immerse your clients in a captivating experience, one in which they can try first rate training firsthand.

# DESIGNED AROUND YOU

## CHOOSE THE BEST COMPANION FOR YOUR ADVENTURES

SG-360 can be **customised to your training needs**, lifestyle, space and budget requirements: choose which of the **4 versions** suits you best. And to give you total flexibility, it is preset for both self-standing and wall-mounting.
